Steel in the Ground in Sarnia-Lambton Transformation within a Hybrid Chemistry Cluster

Scaling Up 2017 Conference November 29, 2017

A.J. (Sandy) Marshall – Bioindustrial Innovation Canada

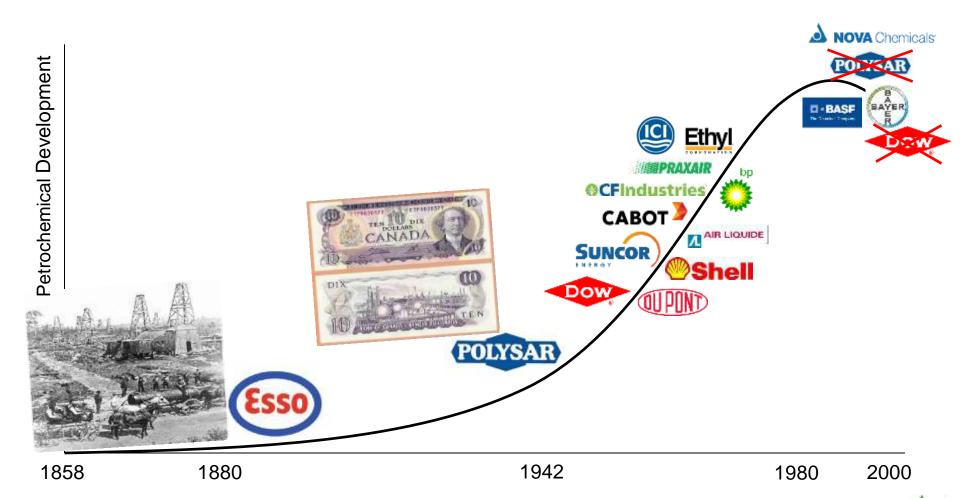

Anne Waddell – BioAmber

Mark Kirby – S2G Biochemicals

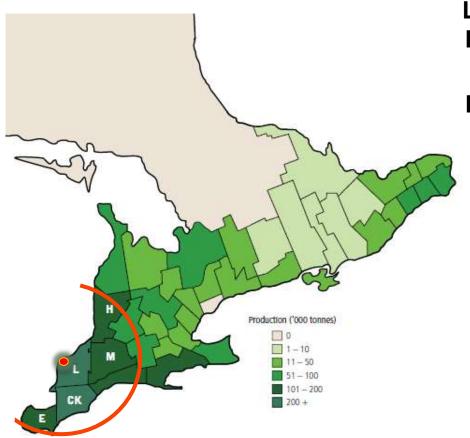

Stephen Galowitz – Origin Materials

Industrial History of Sarnia-Lambton [1858 – 1998] Emergence of the Sarnia Chemistry Cluster over 140 years

Transitioning to a Low Carbon Economy Sarnia-Lambton has abundant agricultural feedstocks

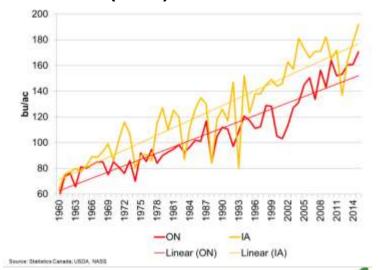

Located within Ontario's Agricultural Heartland

- 45% of soybeans and corn within 100km

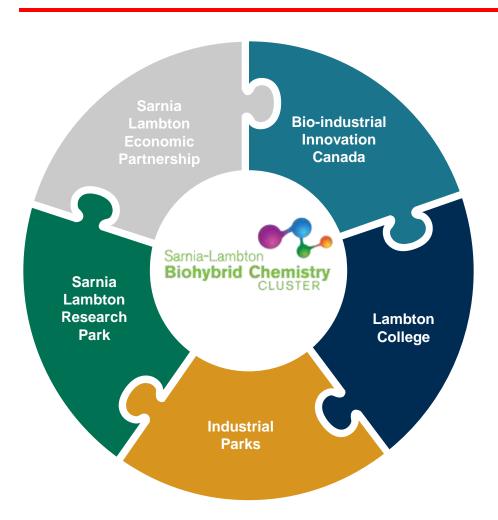

Five County Region around Sarnia

- corn yields comparable to lowa
- more than 1 million bone-dry tonnes sustainably harvestable corn stover available (2009)

Sarnia-Lambton Hybrid Chemistry Cluster Supported through a collaborative ecosystem

Sarnia-Lambton Economic Partnership:

Community and municipality economic driver providing local contact

Sarnia-Lambton Research Park:

Providing assets (laboratory and pilot plant space) for business incubation

Lambton College:

Providing access to applied research capability and highly qualified people

Bioindustrial Innovation Canada:

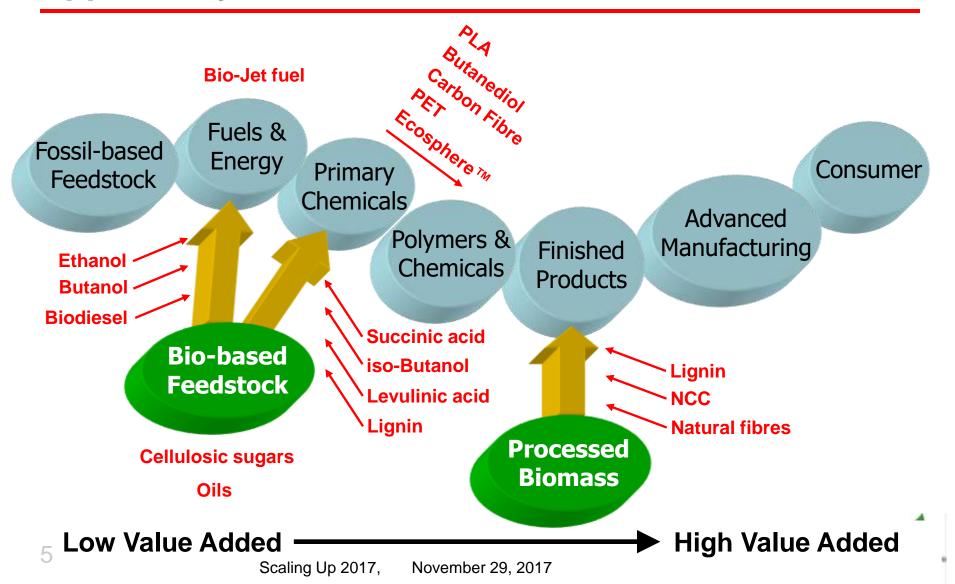

Business accelerator providing critical investment, advice and services

Industrial Parks:

Access to cost effective infrastructure and services for commercialization

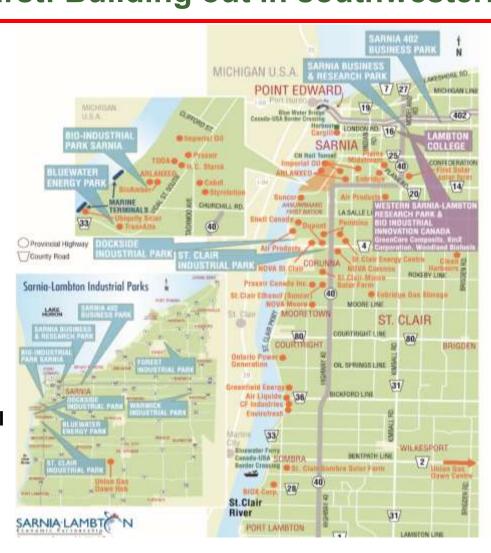

Integrating into the Hybrid Chemistry Value Chain Opportunity for renewable resources to commercialize

Sarnia-Lambton Hybrid Chemistry Cluster [2017] Canada's First: Building out in southwestern Ontario
